**DLR SERIES RADIOS:** The lightweight, sleek Motorola DLR radio provides a simple but powerful collaboration tool and allows the flexibility to configure the radios to meet your procedural needs and optimize staff experience. The license-free DLR features multiple call options which can enhance communications between team members, as well as frequency hopping technology for increased security. Talk Permit Tone lets users know when the channel is free for them to talk, therefore promoting orderly communications. Voice prompts allow easy navigation of menus, channels, battery status and more. The Home Channel feature automatically return users to their primary channel when a conversation is over.

**DTR SERIES RADIOS:** Give team members several options for public group calling through a digital one-to-many feature on the DTR that can accommodate up to 25 groups, from 50 public IDs. Digital one-to-one calling allows you to call and talk privately with a specific user's radio. A private-call recipient can receive an alert – either an audible or vibrating signal. And the recipient's unit displays the caller's ID. The DTR meets military standards for shock, vibration, water, dust and temperature, and can cover 30 floors/350,000 square feet (DTR 550 model) – a wise choice for busy working conditions.
