

Buy a ScrubAir™ Pipette Washer/Dryer and receive a FREE case of pipettes (worth up to \$145)

The **ScrubAir Pipette Washer/Dryer** automates the traditionally time-consuming process of washing and drying glass pipettes using water, detergent and compressed air to wash, rinse and dry volumetric pipettes.

Thoroughly cleans pipettes inside and out. Percolating action of compressed air and water scrubs the interior walls while water and detergent cascade down the outside walls.

Saves water and money. Compared to traditional siphoning methods that can use over 600 liters per load, the eco-friendly ScrubAir uses as little as **12.5 liters** of tap/pure water, which adds up to **water savings costs of \$2900** or more.

Dries quickly with compressed air in about four hours. Models with built-in heater dry twice as fast—two hours.

Accommodates from 12 to 60 pipettes depending on bulb and stem diameters.

Programmable. Factory cycle settings may be user modified. Start time may be delayed up to 8 hours.

Portable. The ScrubAir can be hooked to a sink faucet allowing it to be easily transported from lab to lab. Or, install it using a dedicated water supply and drain.

Purchase your **ScrubAir Pipette Washer/Dryer** now through December 31, 2017 and receive one **FREE** case of **KIMAX®** pipettes valued at up to \$145.
